PORTALDOT HACKER HOUSE 2026 · ECOSYSTEM DAPPS

Provenant.

The training-data clearing house. Labs commit a Merkle manifest + deposit. Authors prove inclusion. **Get paid on Portaldot.**

THE PROBLEM

AI trained on your work. Good luck proving it.

~$1.5B

Anthropic's authors' copyright settlement, as reported by the AP.

Compensation comes after the fact — via lawyers.

- × Training sets go **undeclared**.
- × Inclusion is **near-impossible to prove** later.
- × No rail to **pay creators** at training time.

THE SOLUTION

Commit. Deposit. Prove. Get paid.

01

Register

Author mints their work as a **native NFT**.

02

Commit

Lab publishes a **Merkle manifest** + escrow deposit.

03

Claim

Author submits a **Merkle inclusion proof**.

04

Get paid

Royalty released from escrow, with **vesting**.

One manifest root on-chain. Every author can verify — no lawsuit required.

WHY ONLY PORTALDOT

Five primitives. One runtime.

Elsewhere: stitched-together contracts and bridges. On Portaldot: native.

THE ASK

Train on it?
Pay for it.

Provenant makes AI training provable and payable — natively on Portaldot.
